

## SAN FRANCISCO CAMPUS FOR JEWISH LIVING

---

We are excited and proud to announce the appointment of Dr. Adrienne Green as the new Chief Executive Officer of San Francisco Campus for Jewish Living, effective July 18, 2023.

Dr. Green served as the Chief Medical Officer for Adult Services and Vice President for Regulatory and Medical Affairs at UCSF Health for the last 8 years and is board-certified in internal medicine. She has practiced as a hospitalist at UCSF since 1998. She relishes leading teams to achieve results based on building strong relationships, collaboration, initiative, and excellence. Furthermore, she has managed complex systems and programs at UCSF and brings extraordinary insight into the patient, family, and professional caregiver experience.

Dr. Green's interest in the skilled nursing space started early in her career as a hospitalist when she cared for patients in the skilled nursing unit at Mount Zion Hospital and continued as the medical director for case management that entailed discharge planning in the post-acute and skilled nursing facility landscape in San Francisco.

As a part of a post-acute strategic planning effort in 2014, she helped to launch the first UCSF skilled nursing facility and home health collaborative. SFCJL participated in the collaborative, and it was through that effort that Dr. Green became better acquainted with SFCJL's programs. Her relationship with SFCJL continued and until her appointment as CEO, Dr. Green was a Trustee of the Board.

David Lowi, Board Chair of SFCJL, is "excited that Dr. Green, a former member of our Board of Trustees, has accepted this role. I am confident that she will exemplify one of my favorite Jewish sayings.... "From Strength to Strength May We be Strengthened."

Dr. Green grew up in Portland, Oregon and received her undergraduate degree from Wesleyan University. She attended the Hahnemann University School of Medicine, now part of Drexel University College of Medicine, and completed her residency in Internal Medicine at Stanford University. She lives in San Francisco with her family.

As a Trustee of the Board, Dr. Green says, "I have come to not only admire the care provided at SFCJL, but also to find myself more invested in all components of the organization. As a physician, as an engaged member of our Jewish community, and as someone who cares deeply about our elderly patients and staff who work in senior care, I am inspired and motivated by this opportunity. It brings my passion, training, and expertise together in a most meaningful way."
